I love the concept of this game. Some of the levels are a bit hard but it only makes you want to succeed more. You might rage quit once or twice, but you will be coming back. Also, the short back story and the chicken really add to this game. It is worth the price and overall a good game. I recommend.. The idea is awesome; swapping through different dimensions to find a lost chicken

The one thing is that the game is not easy and not appropriate for people who rages easily.

Because there should be a split line at the middle of the screen, we can't see the whole map to see the goal, and some levels require intense and accurate timing, which I don't really like it, so it's a kinda rage game.

I do recommend this game, but it's hard to beat for the beginners.

Edit: Because the game can only detect up to 3 keys, it can't swap while pressing jump, left, and right at the same time. This is inconvenient tho.

Edit 2: Level 19 is almost impossible because the height of the wall doesn't match with the maximum jump
