An amazing map masked by a tedious startup

Pros:

- Best specialist weapon in zombies - Skull of Nansapwe
- Strong wonder weapon - KT4
- Easy Easter Egg and training room
- Lots to do
- Spiders are an interesting enemy + Spider boss fight

Cons:

- Hard to master
- LONG startup (around 2hrs w/ no gobblegum)
- Thrashers SUCK
- The setting can either be a hit or miss
- Turning on power
- No great training places other than EE room

If you can manage to get everything setup, its one of the best maps in zombies. peak human accomplishment. Best DLC track pack to date. The Mars tracks introduce racing around the outside of tubes as a new mechanic and it feels great, invoking a lot of F-Zero memories. The tracks are also fairly lengthy with several hitting around 1:10 - 1:20 to make a full lap, which is welcome addition to some of the shorter tracks in other packs.

If you love Redout this is absolutely worth picking up.. I bought for 8 bucks and for that price im having a lot of fun. At first you can get overwhelmed by the sheer amount of cards and options, the art is very good and its way more than playing your highest attack value card like some reviewer stated. Its mature themed and requires some time to start getting the hang of it.

needs more sexy sheorc nudity tho

Edit: PvP appears to be dead most of the time, and mostly you play vs bots. Im still having lots of fun with the game.. Terrible game. Mindless grind. Mediocre graphics. No character customization. No voice acting, just grunts and text boxes. Avoid like the plague.. Awesome game! Rujns great and looks great in my Samsung Odyssey headset. The gameplay is very intuitive and controlling the hover bike with the motion controllers works perfectly. Extremely good arcade game! It is a very fast paced game, I don't get sick from movement in VR games and this one didn't bother me either. You can move in all directions very quickly though so those people who are susceptible to VR sickness may be affected. Well worth trying to see for yourself though, because if you don't get motion sick from it then you would be in for a hell of a good time!

It's a fun game where you use phasers and force fields to trap spiders. It also has an X-ray feature where you can see behind walls for a limited duration, which aids in finding the fuel cell (the item you have to locate in each level). It's addictive so far.. PSX One graphics or worse. It won't even run. I'll gladly remove this from my account and say goodbye to my 9,51 €.. Boring game, no fun at all.... This game seemed interesting at first, but quickly became confusing. The puzzles were hard, but not because they were difficult puzzles, just poorly made ones.. Typically a game of the broke THQ; brilliant ideas, rough product. Some elements of this game just simply failed too much to make this a real game.. The game is OK but hardly a true gem. I can't say to people to play this because there are lots of missing features like a map editor and a endless mode in the game. There is also no modding or steam workshop support. The developer also doesn't answer any of the questions you ask them clearly only when the dev feels like It. Sadly stay away from this game until these issues are fixed.
